

삼각형의 두 중선은 서로를 2 대 1로
나눈다.

(Two medians of a triangle divide each other in the ratio 2:1.)

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

Two medians of a triangle divide each other in the ratio 2:1.

\therefore 삼각형 중점연결정리
(Midpoint Theorem)

Two medians of a triangle divide each other in the ratio 2:1.

\therefore 삼각형 중점연결정리
(Midpoint Theorem)

Two medians of a triangle divide each other in the ratio 2:1.

∴ 삼각형 중점연결정리
(Midpoint Theorem)

Two medians of a triangle divide each other in the ratio 2:1.

\therefore 삼각형 중점연결정리
(Midpoint Theorem)

Two medians of a triangle divide each other in the ratio 2:1.

\therefore 삼각형 중점연결정리
(Midpoint Theorem)

Two medians of a triangle divide each other in the ratio 2:1.

∴ 삼각형 중점연결정리
(Midpoint Theorem)

Two medians of a triangle divide each other in the ratio 2:1.

\therefore 삼각형 중점연결정리
(Midpoint Theorem)

AA 닮음
(AA similarity)

Two medians of a triangle divide each other in the ratio 2:1.

∴ 삼각형 중점연결정리
(Midpoint Theorem)

AA 닮음
(AA similarity)

Two medians of a triangle divide each other in the ratio 2:1.

\therefore 삼각형 중점연결정리
(Midpoint Theorem)

AA 닮음
(AA similarity)

Two medians of a triangle divide each other in the ratio 2:1.
