

Segments of two tangents to a circle from a point outside of the circle are equal length.

원 밖의 한 점에서 그 원에 그은 두 접선의 길이는 같다.

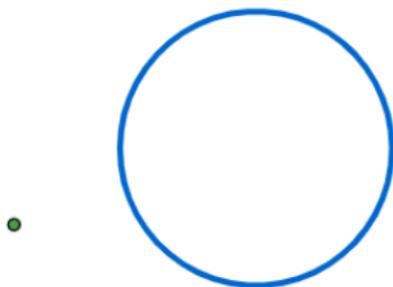

(Segments of two tangents to a circle from a point outside of the circle are equal length.)

Segments of two tangents to a circle from a point outside of the circle are equal length.

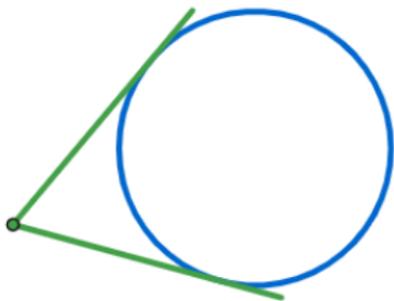

Segments of two tangents to a circle from a point outside of the circle are equal length.

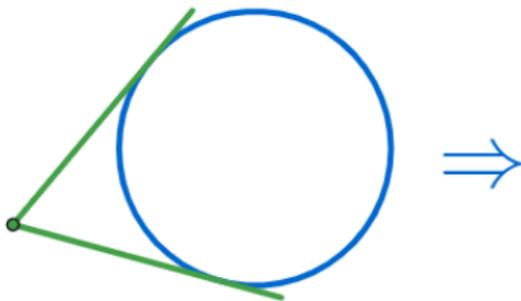

Segments of two tangents to a circle from a point outside of the circle are equal length.

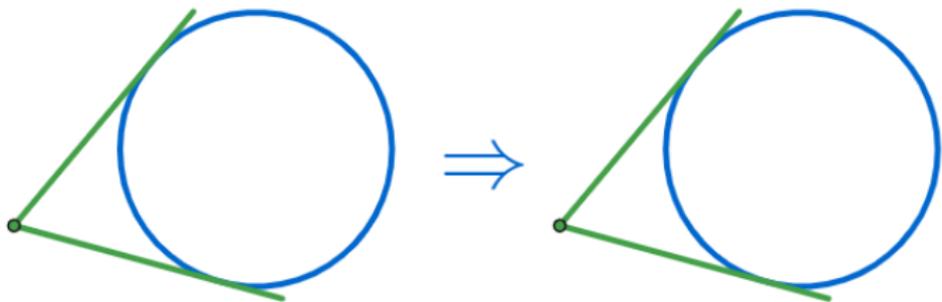

Segments of two tangents to a circle from a point outside of the circle are equal length.

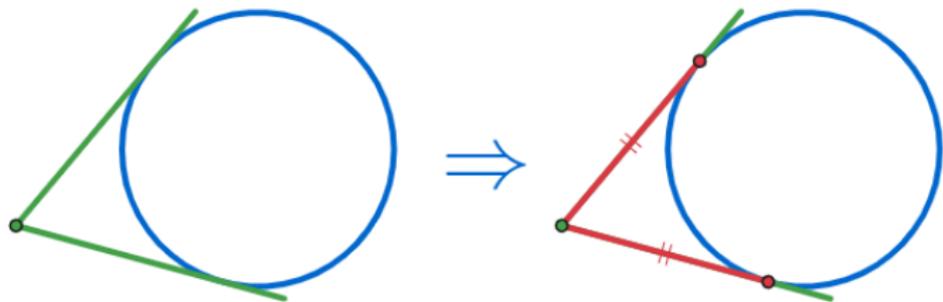

Segments of two tangents to a circle from a point outside of the circle are equal length.

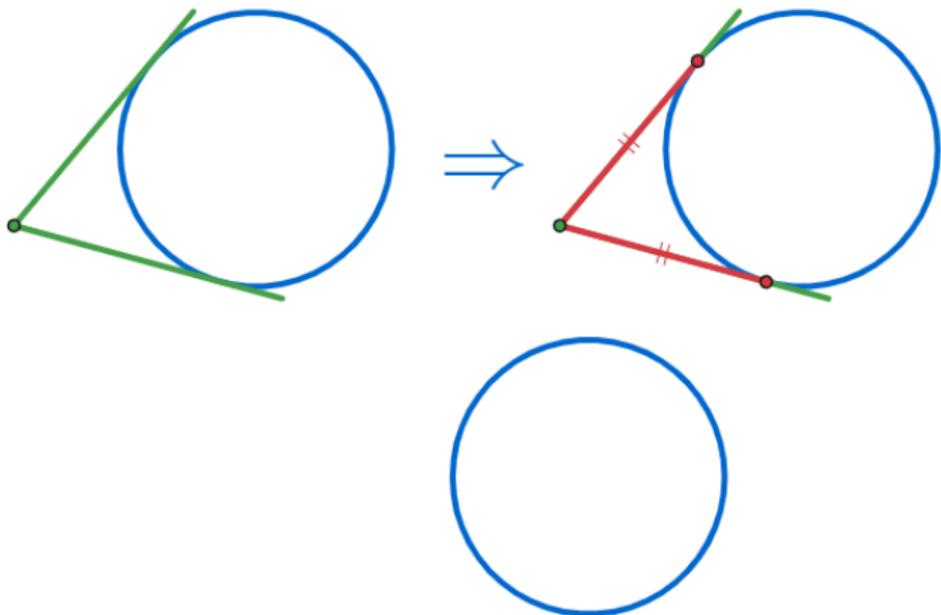

Segments of two tangents to a circle from a point outside of the circle are equal length.

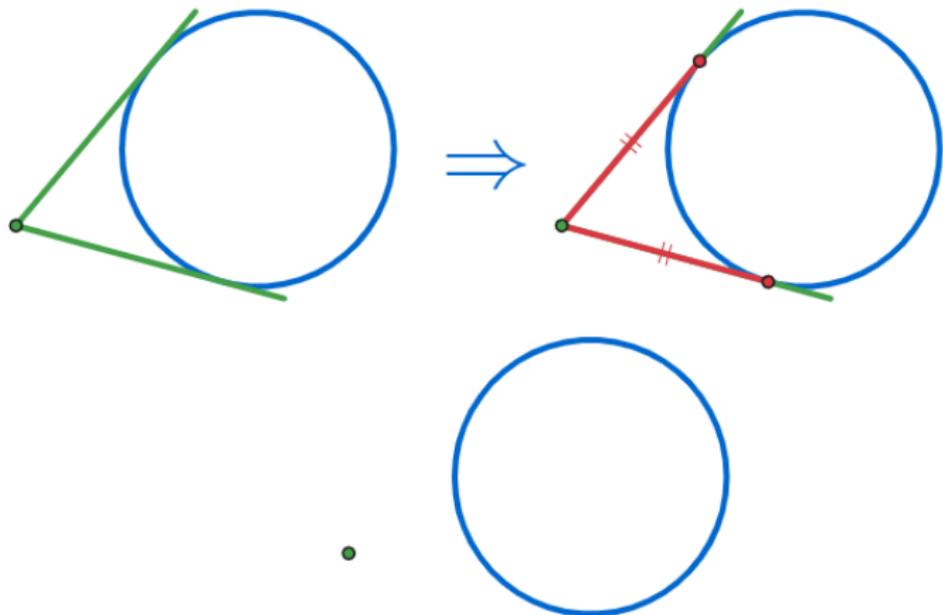

Segments of two tangents to a circle from a point outside of the circle are equal length.

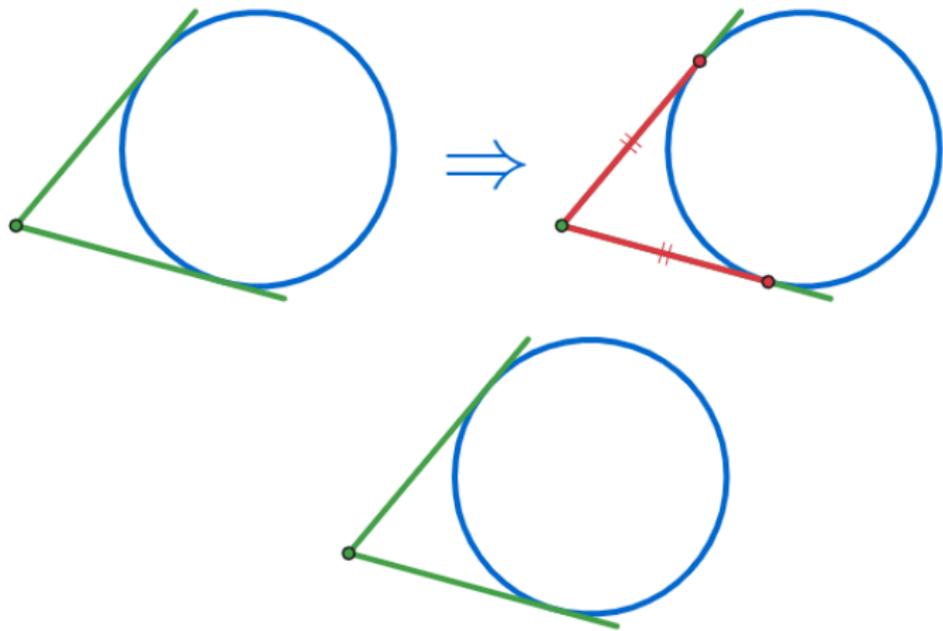

Segments of two tangents to a circle from a point outside of the circle are equal length.

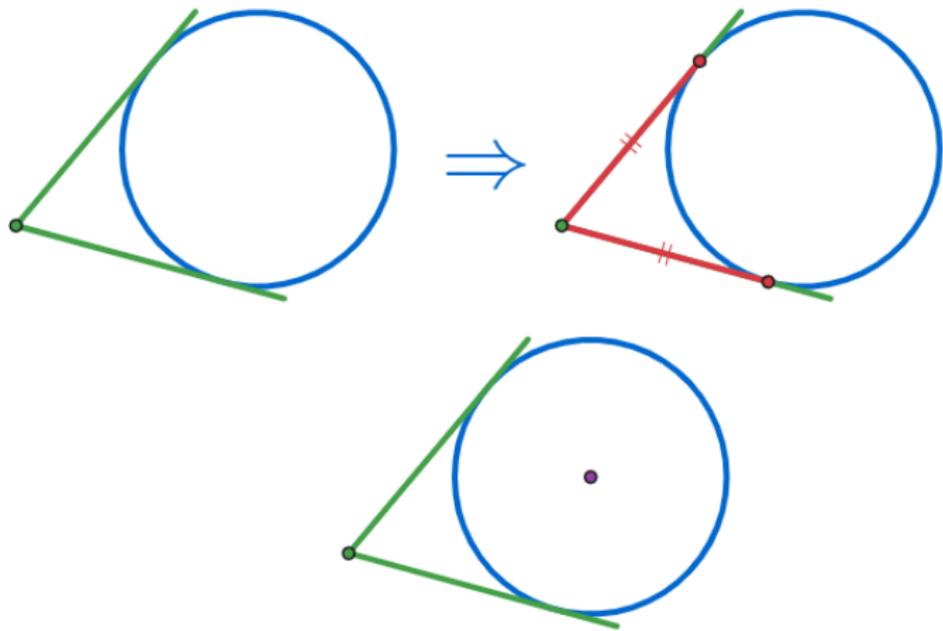

Segments of two tangents to a circle from a point outside of the circle are equal length.

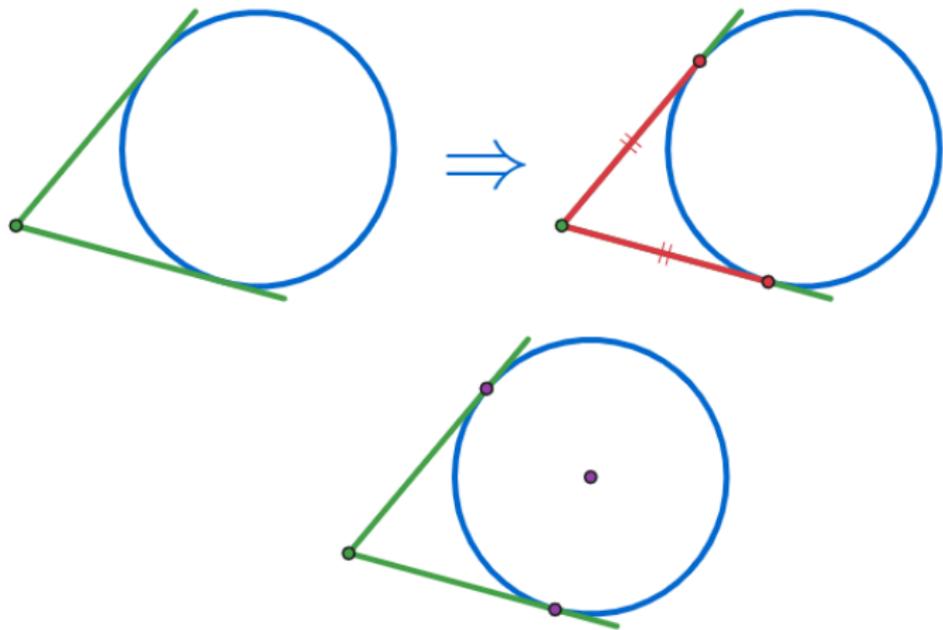

Segments of two tangents to a circle from a point outside of the circle are equal length.

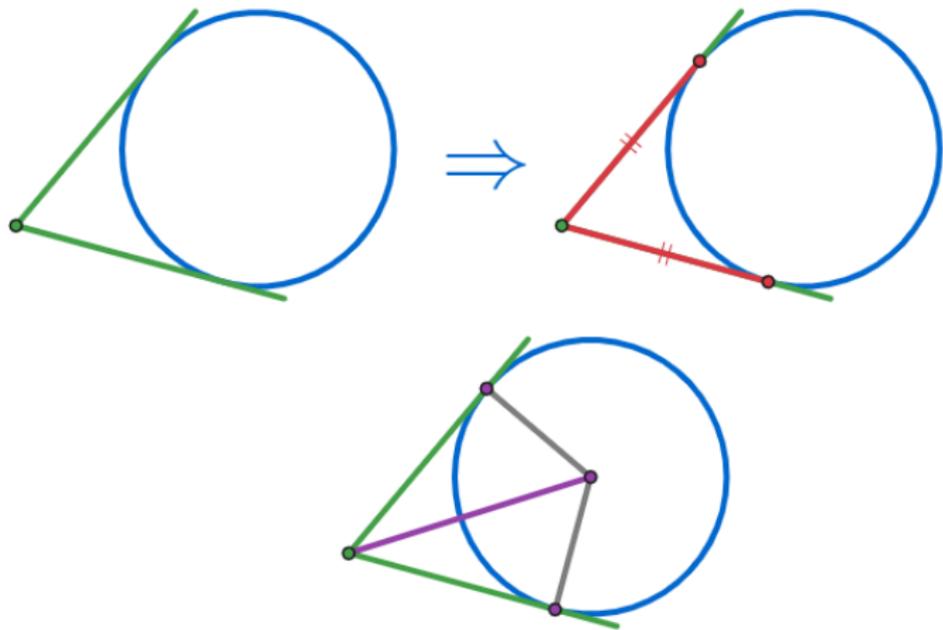

Segments of two tangents to a circle from a point outside of the circle are equal length.

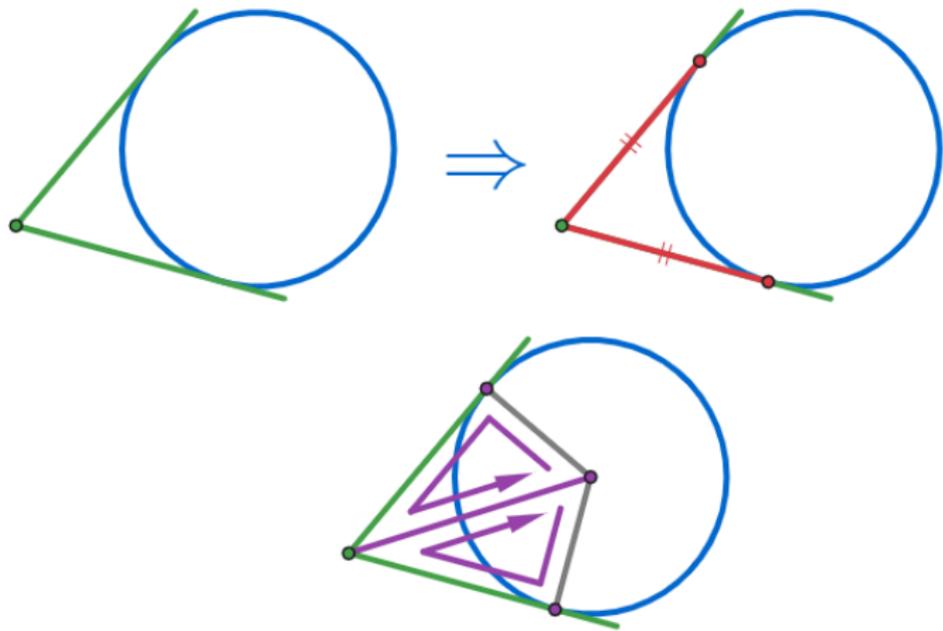

Segments of two tangents to a circle from a point outside of the circle are equal length.

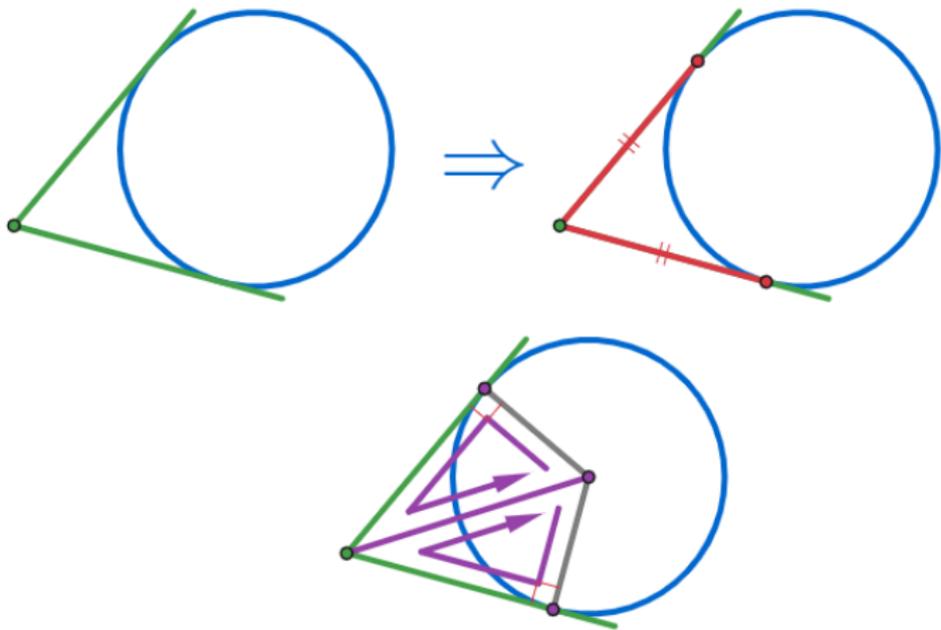

Segments of two tangents to a circle from a point outside of the circle are equal length.

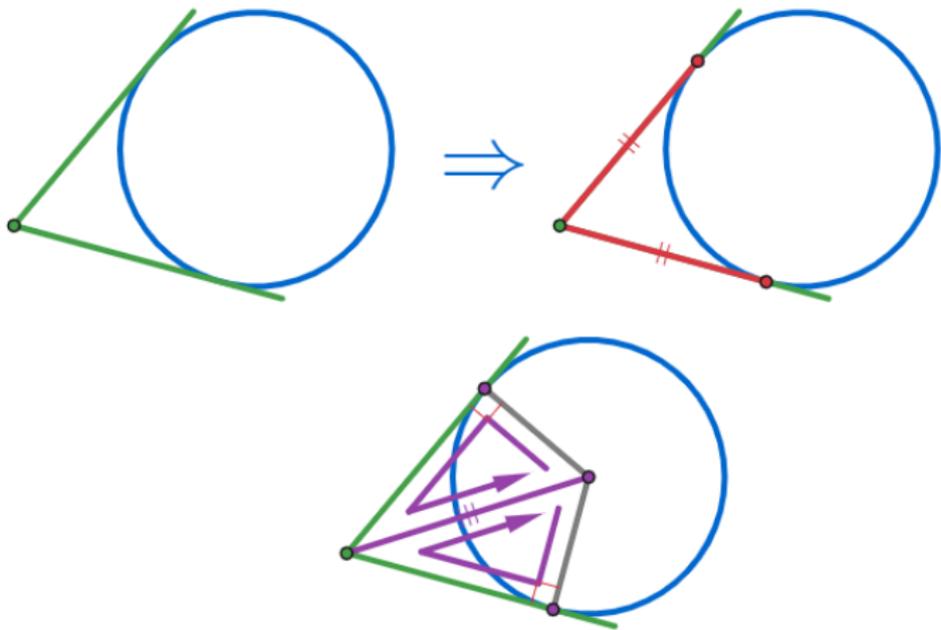

Segments of two tangents to a circle from a point outside of the circle are equal length.

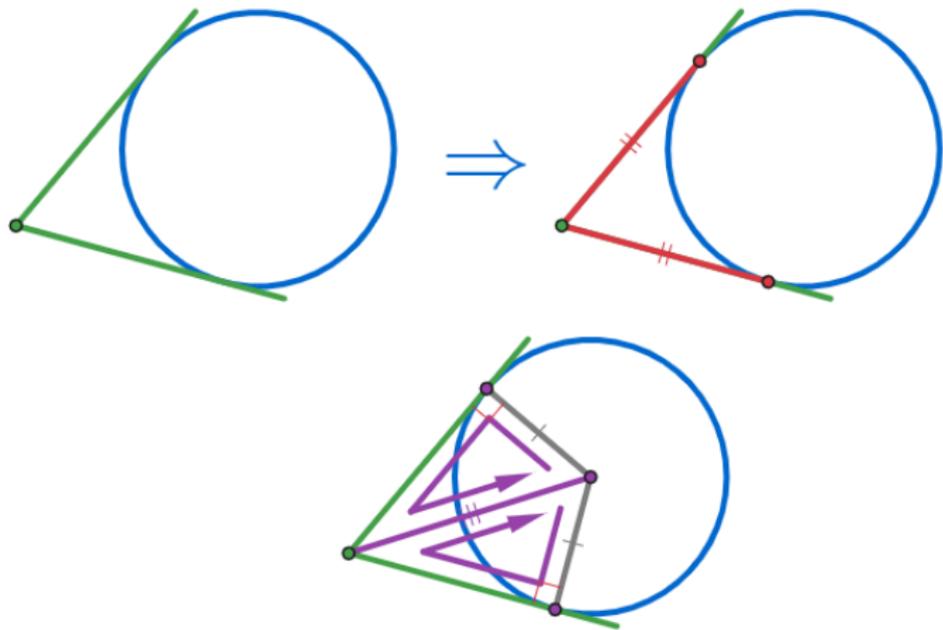

Segments of two tangents to a circle from a point outside of the circle are equal length.

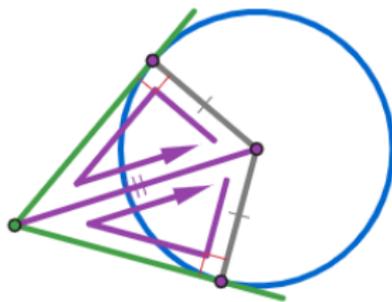

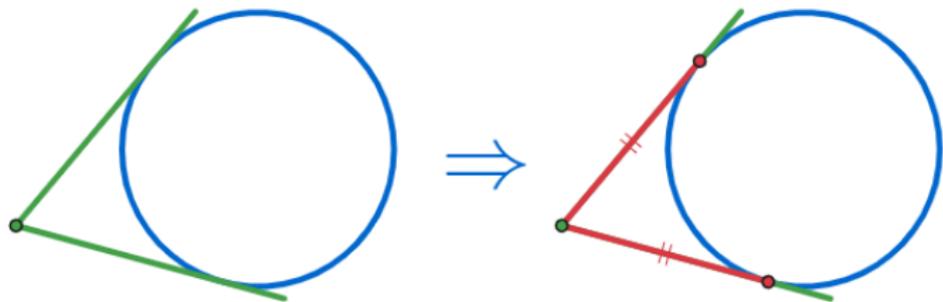

Segments of two tangents to a circle from a point outside of the circle are equal length.

Segments of two tangents to a circle from a point outside of the circle are equal length.

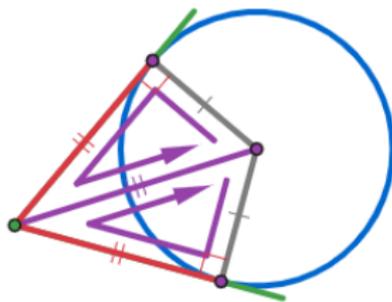

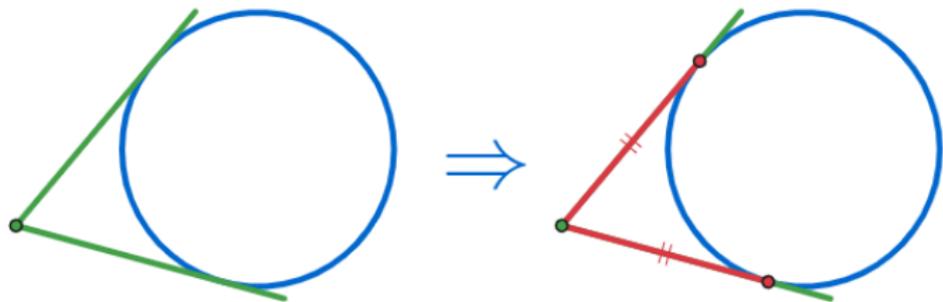

Segments of two tangents to a circle from a point outside of the circle are equal length.

RHS 합동
(RHS Congruent)

Segments of two tangents to a circle from a point outside of the circle are equal length.

RHS 합동
(RHS Congruent)

Segments of two tangents to a circle from a point outside of the circle are equal length.
