Terminology : Focus,
```

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse two fixed points constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse
two fixed points constant.
Min Eun Gi : https://min7014.github.io

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

$\mathrm{F}^{\prime}$

The ellipse
two fixed points constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse two fixed points constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## $\rightarrow$ Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## - Start $>$ End

Terminology : Focus, Ellipse,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## $\rightarrow$ Start $\rightarrow$ End

Terminology : Focus, Ellipse, Major axis or Transverse Diameter,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## $\rightarrow$ Start $\rightarrow$ End

Terminology : Focus, Ellipse, Major axis or Transverse Diameter, Center,

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## $\rightarrow$ Start $\rightarrow$ End

Terminology : Focus, Ellipse, Major axis or Transverse Diameter, Center, Minor axis or Conjugate diameter

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.

## Definition of Ellipse

## $\rightarrow$ Start $\rightarrow$ End

Terminology : Focus, Ellipse, Major axis or Transverse Diameter, Center, Minor axis or Conjugate diameter

The ellipse is defined as the set of points such that the sum of the distances to two fixed points is constant.
