With a length and two focus when distances to the two focus is given, draw a point on ellipse.

일정한 길이와 두 초점이 있고, 두 초점에서 떨어진 거리가 정해져 있을 때, 타원 상의 점을 작도하라.
(With a length and two focus when distances to the two focus is given, draw a point on ellipse.)

With a length and two focus when distances to the two focus is given, draw a point on ellipse.
