

유리수의 사칙연산

(Four basic operations of rational numbers)

Four basic operations of rational numbers

▶ Start

▶ End

Four basic operations of rational numbers

▶ Start

▶ End

Four basic operations of rational numbers

Step Down 10 Step

Step Up

+

-

×

÷

Next Exercise Calculate it.

 $\frac{5}{4} - \left(-\frac{1}{7}\right)$

Solution

Four basic operations of rational numbers

▶ Start

▶ End

Four basic operations of rational numbers

Step Down 10 Step

Step Up

+

-

×

÷

Next Exercise Calculate it.

$$\frac{5}{4} - \left(-\frac{1}{7}\right)$$

Solution

$$\frac{39}{28}$$
